We Can Offer You A Massive Competitive
Advantage With No Capital Investment

Competitive Advantage

So what do you do when a potential customer says :

“I want to compare your quote with two more quotes?”

Do you explain the value your company offers in quality or price or reputation, or maybe even offer a discount?

... but that is exactly what your competitors will do too !!

What if you could offer something your competitors could not?

What if you could save your customer 20% in their heating bills?

What if that saving was worth £400-500 per year?

What if that saving was worth £8,000 to £10,000 over 20 years?

What if you could make your customer ‘greener’ and save them 1 MT CO₂ every year?

And what if that competitive advantage only cost £307 plus vat?

And you only had to make the payment once you have already received a sale?

Introducing Airgon

This clever British technology is located near the boiler and extracts all the air from the wet heating system.

With no air in the system, the water can be heated using less energy (gas, electricity, oil, LPG), which lowers heating bills.

- No air locks means no bleeding of radiators or plumber call out charges ... saving money.
- No air means no magnetite build up, making the boiler last longer ... saving money

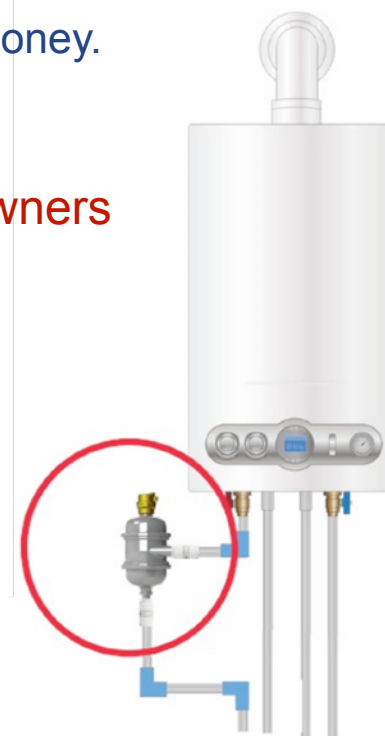

Airgon has been tested and validated by TUV SUD and will save home owners

- **15.47% in heating bills with a new boiler**
- **Up to 31% for older heating systems**

TUV SUD are the world's leading testing laboratory.

They are used by the UK government to test energy saving products.

Their clients include NASA, they employ over 16,000 people and turnover £2.4 bn.

Five Reasons To Include Airgon In Your Offer

Reason #1 : Saves Your Customers 20% In Their Heating Bills

So they will love you for that.

Reason #2 : Will Extend Their Boiler Life By 5-7 years

So you have helped them postpone an expensive additional cost.

Reason #3 : Customers Will Have Hotter Radiators And A Hotter Home

So they will love you even more, especially with no air locks.

Reason #4 : Airgon Costs Just £207.50 Plus Vat

Plus a cost from any plumber to fit.

Reason #5 : Airgon Is Easy To Fit By Any Plumber In Under 1 Hour

Plumbers charge typically around £100 (or less if you have a good relationship).

So for an extra £307.50 plus vat either absorbed in your costs or added to your quote, you gain a MASSIVE competitive advantage.

Which Closes More Deals, Making You More Money.

How does Airgon work?

Airgon removes the air from all wet heating systems regardless of the fuel type. This includes gas, electricity, ASHP, biomass, pellet burners, Oil and LPG.

The results are noticeable within hours of installation with hotter radiators and quieter running.

Without air there is no further build-up of magnetic sludge, which extends the life of the boiler whilst reducing unplanned maintenance.

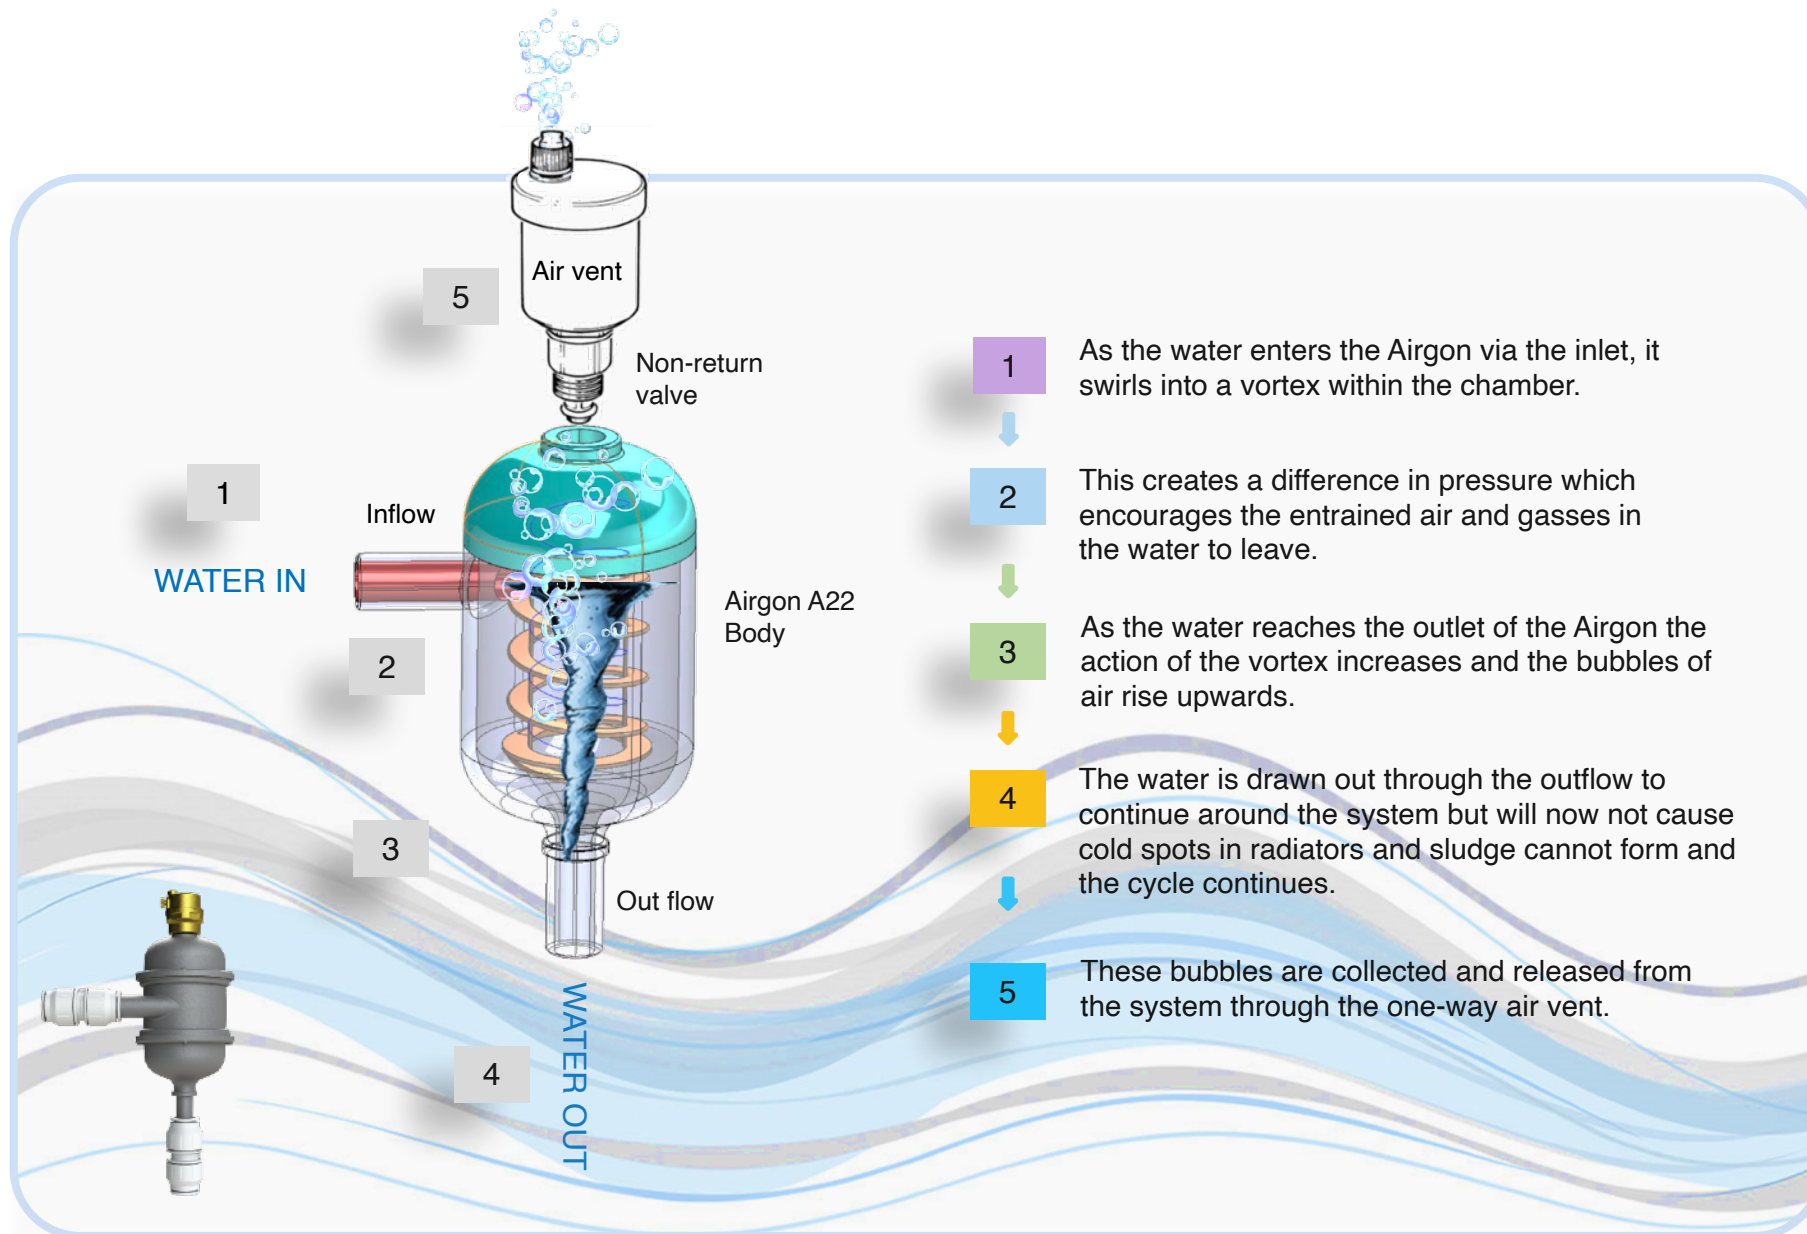

With the air and gasses removed from the system water, more heat is released for less consumed fuel.

Typically, this generates savings of 20% of the heating fuel each year, as well as reduced carbon emissions.

Simply install Airgon into your wet heating system and watch the savings accrue year on year.

“ Typical savings of 20% of the heating bill can be achieved for the next 20 years. ”

Summary Of All Airgon Benefits

- Reduces Heating Bills On ALL Wet Heatings By 15% to 31%
- Savings Validated by TUV SUD
- 10% Guaranteed Savings *
- Savings For 20 Years (Lifetime Warranty)
- No Air Locks Or Further Magnetite Build Up
- Greatly Reduces Plumber Call Out Charges

Using Airgon To Make The World A Better Place

Motor Neurone Disease

We are raising £30,000 for MND by donating £1 from every Airgon purchased.

Helping To End Fuel Poverty

We are also looking to raise a further £30,000 to allow Airgon's to be installed in homes for free for those people unable to afford them.
